

FIG. 1

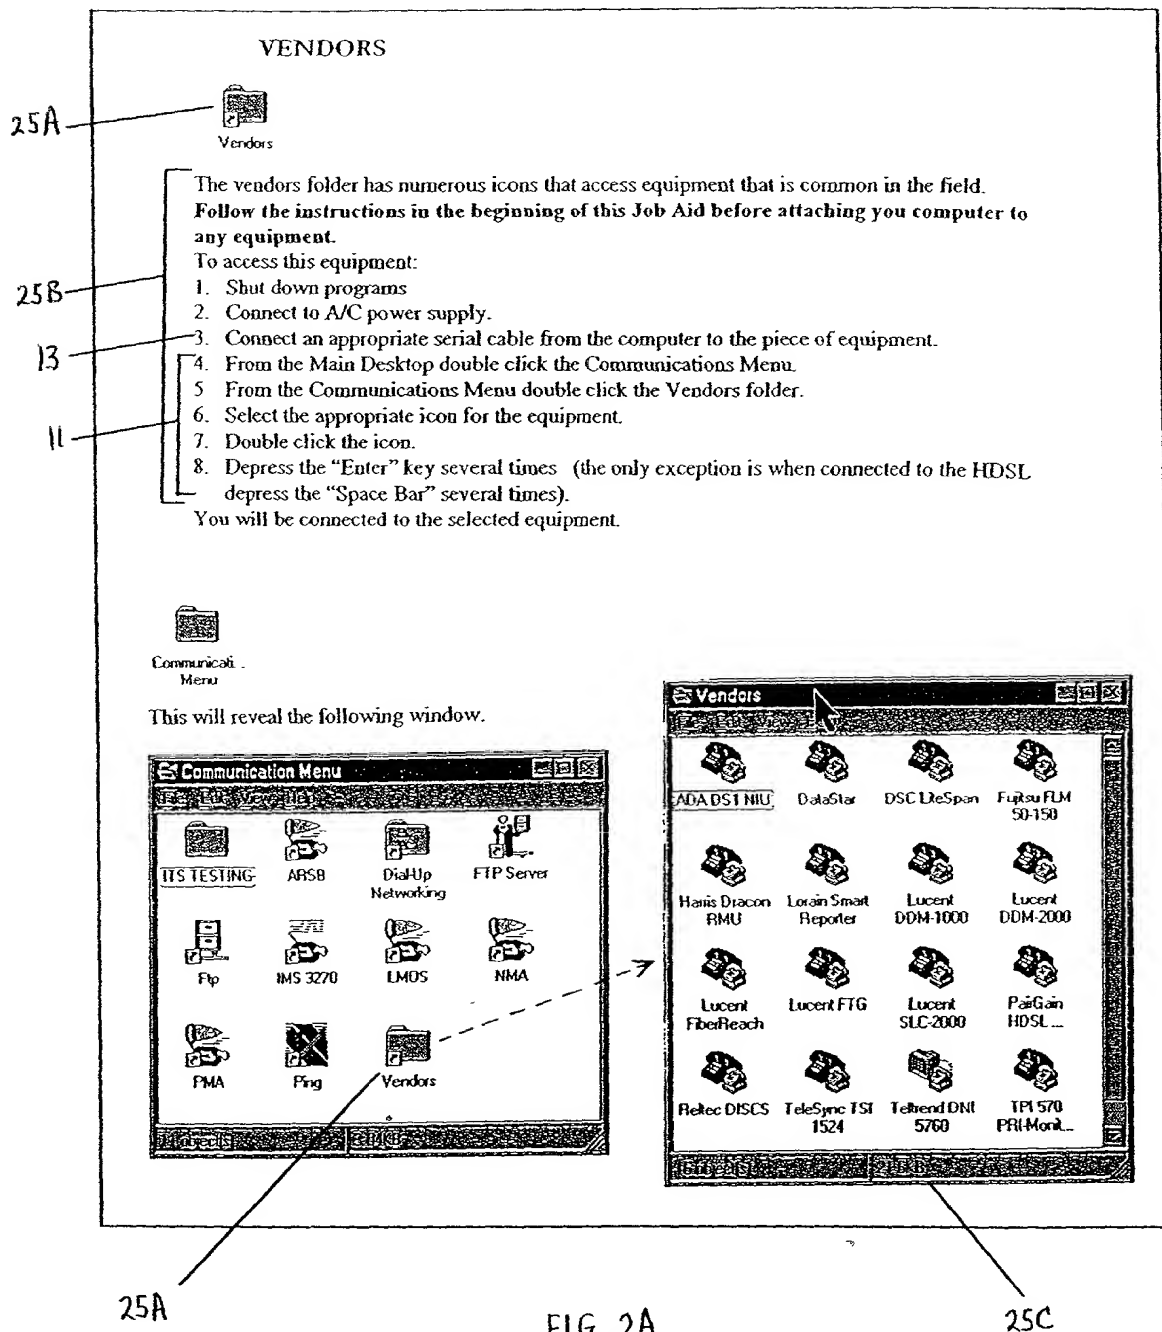

FIG. 2A

MY COMPUTER

The My Computer icon provides access to your computer's disk drive. Double-click on the My Computer icon to display a window with icons representing objects on your computer. You can maximize, restore, resize, and close this window as you can any other window.

Choose View, Toolbar to display a toolbar for use in the My Computer window. You can use this toolbar to navigate through the hierarchy and drives to which you have access. In addition, you have options that enable you to display the contents of your disk drives differently, depending upon your needs and preferences. For example, you can use the Small Icons option to display more icons on the screen, and you can use the Details option to display information about files, including file type and file size.
